

Visit us at the 2011 SUMA Trade Show

FOR IMMEDIATE RELEASE

January 17, 2011

Saskatoon, SK—On January 31, 2011, and February 1, 2011, Mainstream Water Solutions Inc. of Regina, Saskatchewan, invites you to join us at the 2011 SUMA (Saskatchewan Urban Municipalities Association) Trade Show at TCU Place in Saskatoon, Saskatchewan. Mainstream Water Solutions Inc. will be displaying an exhibit at Booth 123.

Mainstream specializes in drinking water treatment solutions for small municipalities and has water treatment plants in operation in Saskatchewan, Manitoba and Alberta. Our ozone-assisted biofiltration systems are cost-effective, easy to operate, reliable and produce very little wastewater. Our proven technology provides exceptional drinking water, even from the most difficult-to-treat raw water sources, including surface and ground water. Mainstream systems are custom-designed to suit each customer's specific needs and conditions, providing from 1 m³ to 2,000 m³ of treated drinking water per day.

Visit our booth or contact us for more information. A complete list of upcoming events is available at www.mainstreamwater.com.

About Us:

Since 1989, Mainstream Water Solutions Inc. has been providing cost-effective, simple and reliable water treatment solutions to municipal, residential, agricultural, and commercial customers. The Mainstream biofiltration system is based upon an innovative biological slow sand filtration process that combines ozone pre-treatment and biological activated carbon polishing to provide exceptional quality water, even with the most difficult-to-treat raw water.
