

## **Visit us at the 2011 MWWA Trade Show**

### **FOR IMMEDIATE RELEASE**

**January 31, 2011**

Portage la Prairie, MB—On February 7 and 8, Mainstream Water Solutions Inc. of Regina, Saskatchewan, invites you to join us at the 2011 MWWA (Manitoba Water and Wastewater Association) Conference and Trade Show at Canad Inns in Portage la Prairie, Manitoba. Mainstream Water Solutions Inc. will be displaying an exhibit at Booth 60.

Mainstream specializes in drinking water treatment solutions for small municipalities and has water treatment plants in operation in Saskatchewan, Manitoba and Alberta. Our ozone-assisted biofiltration systems are cost-effective, easy to operate, reliable and produce very little wastewater. Our proven technology provides exceptional drinking water, even from the most difficult-to-treat raw water sources, including surface and ground water. Mainstream systems are custom-designed to suit each customer's specific needs and conditions, providing from 1 m<sup>3</sup> to 2,000 m<sup>3</sup> of treated drinking water per day.

In addition, Mainstream is also pleased to announce that our Director of Research and Development, Ann Gottinger, will be speaking about our slow sand filtration system at the MWWA Conference on Tuesday, February 8, 2011, at 11:00 am in Ambassador A room.

Visit our booth or contact us for more information. A complete list of upcoming events is available at [www.mainstreamwater.com](http://www.mainstreamwater.com).

#### **About Us:**

Since 1989, Mainstream Water Solutions Inc. has been providing cost-effective, simple and reliable water treatment solutions to municipal, residential, agricultural, and commercial customers. The Mainstream biofiltration system is based upon an innovative biological slow sand filtration process that combines ozone pre-treatment and biological activated carbon polishing to provide exceptional quality water, even with the most difficult-to-treat raw water. To date, we have 19 operational municipal water treatment plants in Saskatchewan, Alberta and Manitoba.
